

The Best Is Always Superior™

For Sliding Doors - Replacement & New Construction

Heavy-Duty Extruded Aluminum Prestige Sliding Screen Door

Product Information Sheet

Superior's heavy-duty Prestige Sliding Screen Door is designed with unique features and characteristics built-in for durability, strength, and curb appeal.

1. **Heavy-Duty Extruded Aluminum Frame** measuring 2 1/4" x 1" offering maximum strength, durability, and rigidity.
2. **Flush Handle Design with Self-Latching Lock**
innovative in design, the recessed pull and finger touch activated lock is a great feature of this door.
3. **Heavy-Duty Extruded Spur Corners** designed to hold the mitered frame corners tightly together.
4. **Self-Lubricated, 1 1/4" Spring Loaded Ball Bearing Wheel Assembly** for excellent range of adjustment and easy touch glide. Each wheel assembly is mounted into a specially designed housing for ultimate protection. Stainless steel rollers available.
5. 18 x 16 fiberglass mesh is standard in preassembled screen doors.

New Upgrade

Upgrade to our SuperiorView™ 20 x 20 fiberglass mesh screen on 9900 and 9500 series sliding doors.
